A photograph of a woman in a white lab coat, likely a pharmacist, interacting with a smiling woman and a young child. The child is wearing a patterned knit hat and a dark jacket. They are all looking at a small white box held by the child. The entire image has a blue color overlay.

Recibus

Electronic Prescription

BY ATOSTEK

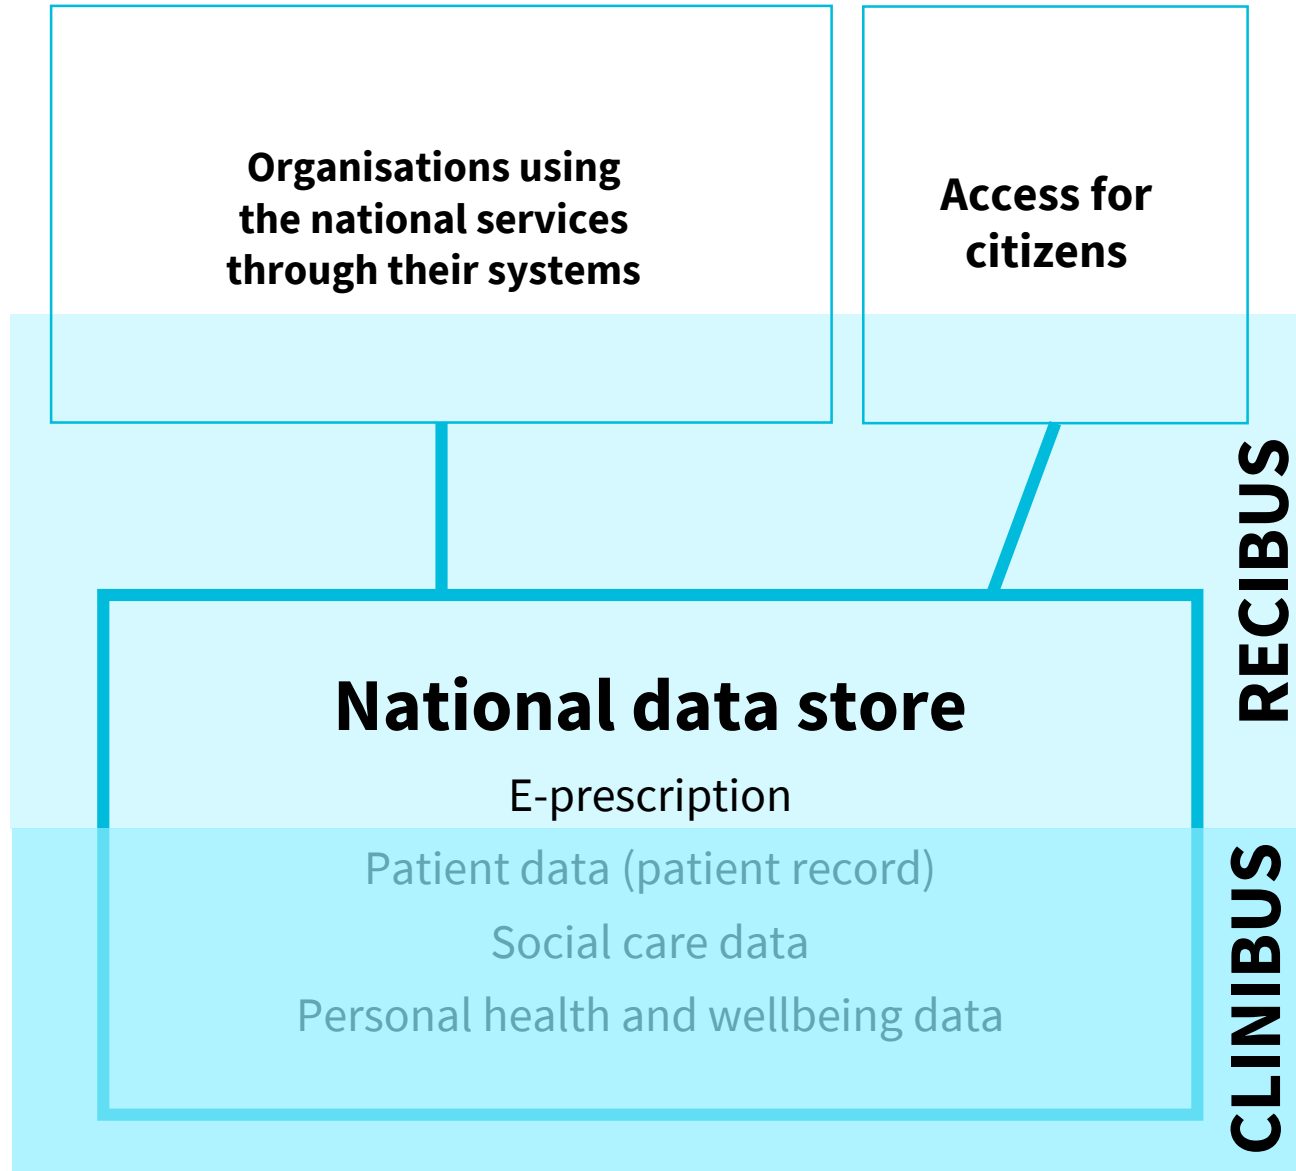

eHealth in Finland

- **2002 Government decision:** A nation-wide EHR system by the end of 2007
- **2005 An agreement:** National archive for health information (Kanta)
 - Three nation-wide services: Electronic prescription, EHR, access to patient's own data
 - New legislation was needed to allow the new features: Consent management, privacy and security aspects
- **2017 Electronic prescription is mandatory in Finland**
 - Every licenced doctor is required to have an e-prescription provider
 - Paper prescriptions are not accepted in pharmacies or they have a fee to convert prescriptions to electronic

What is Recibus?

- **Electronic prescription** as a browser-based service to
 - Create, store and view prescriptions
 - Dispense medications
 - View patient's medication history
- Prescriptions are available **on real-time** everywhere and to **all organisations** configured to the system
 - Prescriptions are secured with digital signatures

Why do countries need **electronic prescription**?

- Healthcare professionals can view patient's medication history from **a centralized storage**
 - Prevents duplicate medications
 - Reduces drug abuse
- Prescriptions don't have to be physically on paper
 - Can be delivered over internet connection
- **Reliable drug substitution is possible** using a database of compatible drugs
- Electronic prescription **improves medication compliance** by **removing the risk** of losing a prescription

Why Recibus?

- **Recibus is a complete solution.** You don't need anything else to start using electronic prescriptions in your country
- **Recibus is a centralized solution**
 - All joined pharmacies can access prescriptions
 - Patient's full prescription history can be viewed by healthcare professionals
- **Recibus is a secure solution**
 - Prescriptions are secured by each doctor's digital signature
- **Recibus has a full integration API** for EMR integration

What do you need to start?

- Workstations
 - Internet connection
 - Browser
 - SmartCard reader
- Server space
 - AliCloud, Azure, AWS, Google or local data center

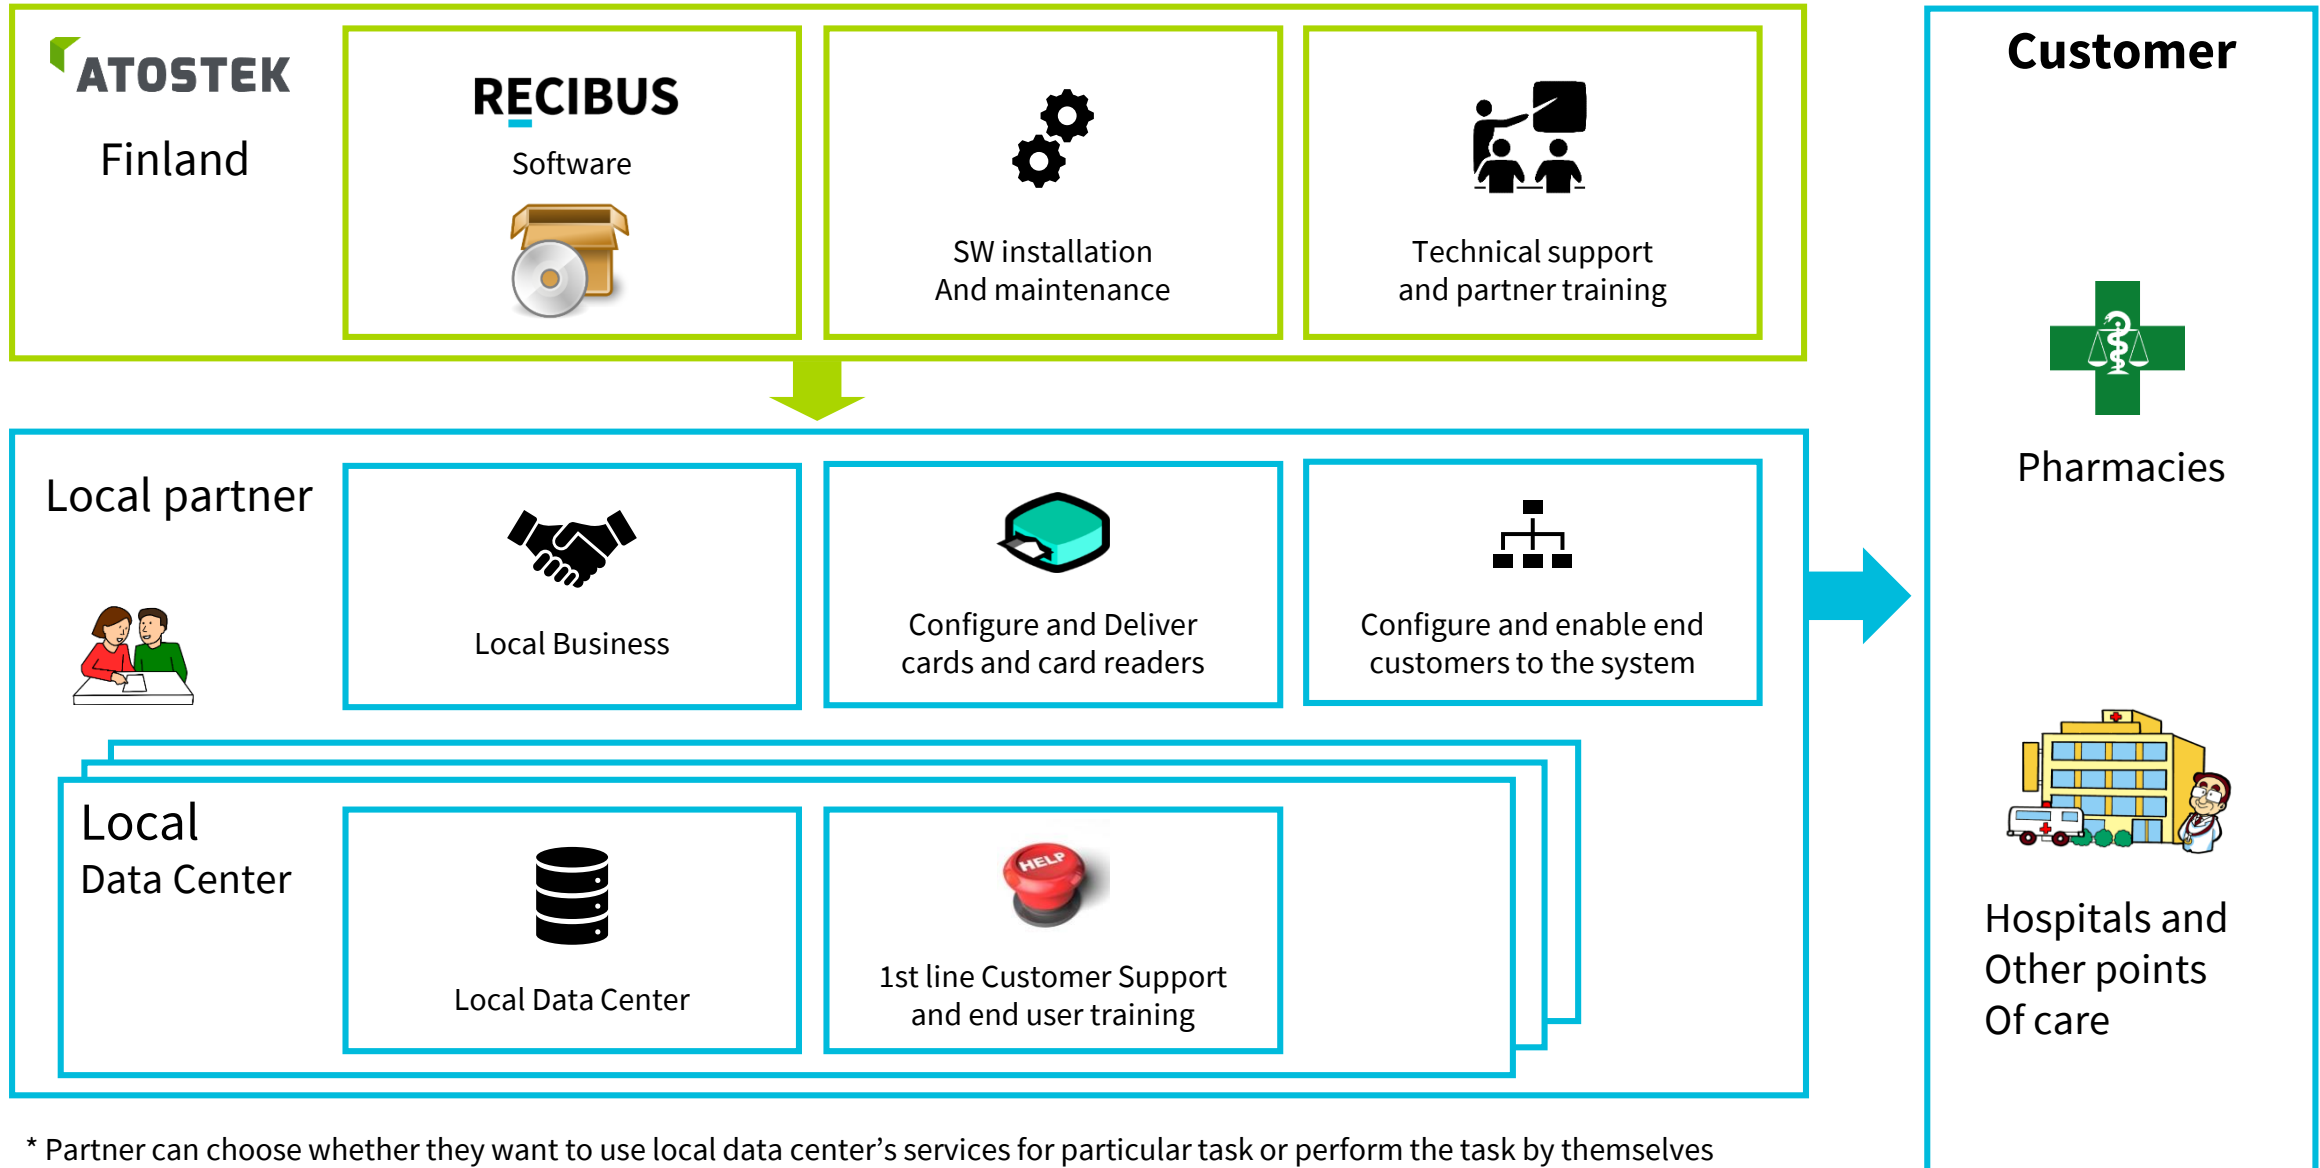

Offices in Tampere and Espoo, Finland

Founded 1999

Currently 90+ employees
